assword Match			
Actual Behaviour	Successful		Description
Error Message pops up "Passwords do not match"		×	Password is invalid as both passwords type do not match
Account has been created sucessfully		√	Password is valid as both passwords type matched

Things to note

Change password, does not require current password to be correct to change Register User name cannot be empty string

For Login Page, if password exceeds 16 characters, it says password "too shor

rt" instead of "too long"
